

Our vision

ON, the orthoregeneration network is an independent internationally active foundation in the field of orthopedic tissue regeneration driving the development and understanding of new treatment strategies for the well-being of the patient.

Our mission

- We promote research and discovery in the field of orthopedic tissue regeneration including the use of biologic therapies to drive innovation and develop improved patient-centered treatment solutions.
- We provide guidance, education and knowledge for surgeons to improve clinical practice within orthopedic tissue regeneration and biologic therapies.
- We foster a network of young professionals, experts, societies, industry and decision makers to advance the field of orthopedic tissue regeneration. Collaboration is key to us.
- We help the patient by driving innovation, setting standards, providing education and sharing information.

Our values

Committed to regeneration and biologic therapies

Independent

Evidence based

Unbiased

Impact oriented

Credible

Empowering

Cooperative

Personal / Patient-centered

The ON story

The **ON FOUNDATION** sets quality standards, spreads unbiased knowledge about orthoregeneration and links young professionals, experts and academic organizations all over the world. Together we build a strong network and guarantee innovation.

We believe that research is the engine of development and that linking and educating passionate young professionals is the way to advance the field of orthoregeneration significantly. Ultimately this will help the clinician and improve the quality of life for the patients.

We are an independent non-profit organization, our information is credible, our network is open, our aim is to advance the field of orthoregeneration and our team is committed.

We stay in motion.

ON FOUNDATION | Advancing regeneration together

myON

The orthoregeneration community platform myON connects scientists and practitioners worldwide and provides information and tools to support all activities of the **Orthoregeneration Network** online.

Innovation

We promote innovative ideas and approaches. We support research that answers open questions, improves therapy and contributes to evidence in the field of orthopedic tissue regeneration.

Education

We believe in sharing information throughout the network of orthoregeneration experts to multiply the existing know-how and strengthen its impact.
